## MY THEORY

I hold a strong belief that the world is a better place when we have agency to do what we love and become the best version of ourselves. As a coach, I help you look inward so you can unleash your unique potential, fall in love with your process, and design the abundant life and career you deserve -- building the life of your dreams into a tangible reality.

## MY STORY

For over a decade, I've worked diligently as a singer, actor, entrepreneur, and educator in and around New York City. My passion for both psychology and our human capacity for greatness led me directly to the craft of coaching. I have combined this love of human expression with the tools of neuroscience to empower creative entrepreneurs, team leaders, and business owners. Together, we identify and create actionable plans towards their goals and tactfully clear the way for them to step boldly into their power.
